Wow thats a lot of work you've done. A quick question, I currently use Scorpio9a's rend39d, and I really like it because of the FPS boost and increase in quality...will I still be able to either use it with scripts 3.0, or stay at 2.9x and use it? I'm not sure I want to lose the FSAA, but I guess I should give it a try to see if I can even notice the difference.
