I assume your talking about phprenbot here?

Anyway, assuming your using PHP with a MySQL database, and ignoring the connection to the database code.

Code to increment a counter each time a name is seen.. code is case-insensitive.

```
$playerNameQuery = mysql_query ( "SELECT * FROM players WHERE LOWER(name) = \" .  
lc($playerName) . \"\" );  
  
if ( mysql_num_rows ( $playerNameQuery ) > 0 )  
{  
    $playerData = mysql_fetch_assoc ( $playerNameQuery );  
    mysql_query ( "UPDATE players SET timesSeen = (timeSeen+1) WHERE name = \" .  
$playerData['name'] . \"\" );  
}  
else  
{  
    mysql_query ( "INSERT INTO players ( name, timeSeen ) VALUES ( \" . lc($playerName) . "\",  
1, )\" );  
}
```
