Sniper_De7 wrote on Sun, 19 November 2006 04:27 When I had a voodoo5500 when I started playing renegade 4 years ago I could pretty much see through the walls ceiling and floor of a building. Thankfully, all I had to do was to alt tab and go back into renegade so that I could see where I was going. Trying to shoot people when you don't know there's a wall = pretty crappy.

My sister's old old computer like three years ago had a 16mb voodoo, and it did exactly that. It's because it only supports OpenGL.
