Today I just finished reworking my flood infection forms (originally added on 12/05/05), they use to grind my new computer (which has an AMD Athlon 64x2 Duel Core Processor 4400+, GeForce 7300 Le graphics card, 2048 MB of Ram, and a 320 GB hard drive) down to 12 FPS (or lower), they brought my old computer down to 8 FPS and any thing lower than that they would crash the game when they we spawned. Now they bring my new computer down form 100 FPS to 50-44 FPS. So obviously this is a huge improvement.
