i opened some .mix files and have noticed cinematic.txt file inside them.. it might be possible to do what you want as part of your map.

Infact I think it is... I will write you a tutorial for doing it server side, then it may just be a case of adding the cinematic to the .mix file when it's ready. I am pretty sure it can be done using default ren scripts too...

Infact the more I think about it the more I reckon it will be possible.
