Lets start from the beginning here.
Quote:Dave Anderson is a 16 year troll who thinks he is an absolute legend with visual studio. That's all he is. He doesn't even seem overly skilled, but he is very arrogant over it.

Spelling and grammar aren't that big a thing. Only for idiot eltists like Dave Mason, who happens to be a completely worthless troll. But when thrash tries to educate people about something it's incredibly annoying to trawl through his abortions of the English language.

Just stick to troll, asswiser is just an annoying label.

Lets start with the "I am a legend with Visual Studio" part. I do not know where you have gotten that phrase from. I have never said to anyone, or posted anywhere that I am even remotely good with Visual Studio, whether I really am or not. Do I think I am decent? Sure, but like every programmer, I am still learning. But I do not go around bragging "oh my god I can do this and you can't". Whether I seem "overskilled" to you or not is just stupid considering you have not seen half of the things I have done, and from what you have probably seen, you can't possibly pass judgment on.

As for "running a company" let me apologize for trying to get somewhere in life at an early age so I am not stuck in poverty later in life. Let me apologize for doing something I am passionate about. Let me apologize for trying to be a professional, mature and respectful person. I can't see how you can possibly dis someone for trying in life. What are you doing to try and make your life better?

Quote:I seen your site and it's like you're stroking your giant e-penis with the whole "I'm a programmer" thing you've got going on.

My site is about computer programming, yes. Just because I have a website relating to programming you dog me for it. That does not even make any sense. That would be like you saying the same thing about the programmers of many game mod's just because they have a website for it.

The fact that you even bring up the name "deadfive" shows me that you still have a grudge from the days of my idiocy. Get over it. Yeah, I was younger, immature and stupid. I have been sincere about my apology towards this community for the way I acted back then, but I can't change the fact that it did happen. You bringing it back up shows me you are trying to dig dirt up from the past and use it against me in your argument that I am some kind of a "troll" as you say.

Also, leave Help-Linux out of this, he has nothing to do with any of this.
