ROFL!!!

If our team is owning and we have the other team down to one building, inevitably there are a number of engies inside repairing it as we go to town on it. So, what I'll do is run by the back door, near the MCT and chuck in a timed C4. (especially if it is a Refinery, as it is right by the MCT) IF we don't kill the building by the time the C4 goes off then I get some major boinkage in one shot! I think I got 6 at one time once. That is allways a lot of fun.

There was a time when I was playing with a brand newbie and he was learning how the game worked. I stuck a times c4 on him and then kept typing "tick, tick, tick..." When it went off he was like, "what happened?" And I just sat there and laughed and laughed!!!
