What he's trying to say is:

klote2314Hi, my modifications are not working correctly. I have set the light tank to shoot the obelisk weapon and it will do the damage that the building does, but it will fire the tank shell, not the triple beam it normally has. Also, i tried to make the chaingun fire the rounds normally used by the obelisk and personal ion cannon but that is failing too.

Help would be appreciated.

I am helping him on this modification but this has stumped me too.
