Quote:he only thing i did different on the comp today was open bitcomet and start a torrent load, using BC for the 1st time.. ive closed it now)

Big chance something travelled along with what you downloaded with Bit comet. Tried a virus scan yet?

Also to manually watch which ports are open you could try CMD-> Net stat -o -n

a virus scan Virusscanner ofcourse not to forget.

Also it could be your ISP today it could be better tommorow.

It could be various of factors playing along but these might help.
