ok im am slowly understanding this...lol. I have edited some files and they dont seem to be working. I have edited the admin file to allow myself to be the only administrator. But i still cant use any of the commands.Also i have set up some moderators in the masters file but they cannot do anything either. i have set it up in the file like this. Is that an issue

Natester6

I also have a problem with commands such as the !bl. NONE of the people that log on can use them these commands also do not show up when i type "help" in the console window. i just get all of the commands that a server set up right through WOL can get. None of my commands show up with ! in front of it. Could this be one of my problems? i have instaled SSAOW 1.5 and have moved the folders over.

I HOPE SOME OF MY DIAGNOSTICS CAN HELP I HAVE BEEN WORKING ON THIS ALL DAY!!!!
