Plane blowing up or hijacked in one hand or someone seeing your bones. I can see the dilemma in this decision.

Yes, because privacy is so overrated...

This is just another way the government can expand its power.
There are other ways to protect against hijacks.

I don't like bigger government either and i have very conservative values but to me someone seeing my bones through an x-ray to see if I'm carrying a weapon or bomb isn't a big deal.

If they can stop just one plane from blowing up or being hi-jacked then x-ray me all you want.
