The complexity of 90% of these "features" ensure only the 5 people here know what they are, let alone what they do. The other 2 can pick up the rest. You're now introducing more problems than solutions. There are things that should never be made accesable to the public. I could lie to you and say I think you're doing a great service. But knowing that they have access to the d3d device scares the shit out of me. What the Hell are you thinking?
