The problem arose yesterday when I tried to play renegade online. When the server loaded I did what everyone else does and began to press the movement keys except in my case when I pressed them I was not moving.

:::NOTHING TO DO WITH THE FOLLOWING:::

Moving my mouse around then start moving as I get that most times and know how to handle it, plus the fact I cannot move my cursor anyway.

The previous topics about only being able to move forward as I cannot move in ANY direction.

The controls not set up as I cannot press Esc to even change them as a matter of fact I cant press any key so to exit renegade I have to Alt + Tab then Control, Alt + Delete it .

ANY help AT ALL will be much appreciated

Thanks in advance.
