Terminator 101 wrote on Fri, 22 December 2006 17:01Have many people started using IE7? I tried it, but I hate it. I am so used to the old look that I returned back to IE6. Now I started to use Firefox and I am loving it.

Too bad Gunbound still uses IE only.

Install that. It's not only great for web designers who want to check to see if their designs work in IE as well as Firefox, but it also helps for those annoying pages/sites that will ONLY work correctly in IE. You can just set the certain page up in the options to always open up in the IE rendering.
