Finally got it.

It took me three days of scanning forums, and .net 1.1 is giving me the fatal engine error 0x7972e030 now every morning, but I finally got it running smoothly at lowest settings.

Gone are the days of install and play....

Anyways. Had a blast the last few hours killing aircraft with arties. Love the titan feature.

Overall: good game, bad support/Setup programming.

Who's playing, and where?
