I think we'll go back to the "old" method, If the Admins/Mods think they are getting pwned too much, ban! (Joking)

lol! at least this is kinda fool-proof
imho a good, attentive mod is better than any AC software/detection method anyways. its sometimes just too obvious if someone is cheating.

regards,

0x90

What a conundrum you present. On the one hand you're praising a human moderator over anti-cheat software, and on the other hand you're devoting so much of your time (which might be better spent attending school or getting a job, forgive me that I don't know how old you are) to invalidate that.

I suspect you're just rather dim-witted...
