Heh, Half Life 2 Is more of a game for Top of the range PC's, Thats one of the reasons I don't play it, And CS:S Was good, Until the DWP kicked in oh, and the fact something kept crashing my whole pc when i joined a server for CS:S.

CS:CZ and CS 1.6 were good games, not exactly "Uber 1337 Graphics" but more to the point of realistic weapons and recoil, the only thing I don't like about them games is that it's full of hackers.
