and to do it in leveledit, press ctrl & "+" (numpad) for a few times to increase draw distance. Go to background settings and disable the fog. Learn how to move around, and move your camera to a convenient spot. and boom, screenshot.

this didn't work although, i think i should of. anyway i went to camera->(can't rember) and looked for your shortcut on the list. clicked on in and the map reapeard. thanks for the help! the Seye can continue...
