Lmfao, sure would. Geeze, I wonder how long and how much it would cost for you to get a tube. (Or you can create this transport thingy, but then somone will h4x it like 0x90 and recreate the addoms (or something like that) and we can get the same thing billions of times.)

One thing 0x90 would be good for.

And imagine, if your xbox 360 would get fucked up, just recreate addoms, GG.
