sirownyou wrote on Fri, 05 January 2007 18:08what do you mean?

Do you see in your IRC(Internet Relay Chat) channel your bot appear and does it "say" things in your channel?

Try looking in your IRC channel while you kill somebody and look if the kill message appears there.

If not: double check your NR (for irc channel and server) and your server.ini (for remoteadmin, remoteadminpass and remoteadmin port) settings.

Check if the remoteadmindetails are the same in your server.ini file and your NR settings...
