If you're only on WOL, make a file wolbanlist.txt and place it in your renegadefds/ directory. Add the name and ip like this

nickname:1.2.3.4
nickname2:1.2.3.4

replacing the nick and sample ip by the real ip/nick.

You can use * as nick if u only know the ip or 0.0.0.0 as ip if u only know the nick.
