Chronojam wrote on Mon, 08 January 2007 22:59 Basically it smears it along vertically. If you make a texture that looks like ||, you will appear to have two tubes coming out of your gun. If you make a texture that's just a square, you'll have a solid beam. If you make a texture that's got four dots along the top, you'll have 4 light thin beams.

Right there.
