darksnipa wrote on Tue, 09 January 2007 23:46Look at the K/D Percentage. If someone has let's say 70 kills 2 deaths, the person is probably cheating.

Or maybe they are good

Quote:Another thing:
Let the person shoot you in the legg with a pistol. If it's 1 shot kill in the legg, ban him. Also let him right click fire you with pistol, it might be that you are healed again. Instant heal hacks in that case.

Damage hacks are usually right click only, obviously he would shoot with said left click only

Quote:Let someone fire at a wall with autorifle or sniper, when someone is behind that wall. If he kills the person, he's using wallhacks.

retarded, how are you going to tell if he lined the shot up correctly - a screenshot would be much more effective although I doubt that many people really use wall hacks any more.

Quote:Let someone fire at a turret or empty tank with a mobile rocket launcher system. If the health drains drmatically, he is also hacking. MRLS have infinite ammo and almost no reload time then.

Sorry what? u mean if someone is using final ren? pretty sure you don't need to test for that tbh.

Quote:Let the person left click an unbound tank with the pistol and let him right click it. I prefer to test on harvester. If vehicle gets instant kill...he cheats.

See above

Quote:Let the person equip a timed c4 and let him use it on harvester from a decent range. If the harvester is killed instantly, the player cheats...This is part of the Immortalkillheavy cheat, I know the effects cause I tested the cheat.

Pretty sure that c4 damage is controlled server side and it can't be altered by hacks

Quote:
Also let the player fire at the Nod Cargo Plane when delivering a new vehicle. If your vehicle get's stuck in the air or falls out of the map, the player is cheating again.

Quote:Hope this helps a bit, cause I have tested multiple cheats a while ago. I know almost every cheateffect.

No, and obviously you havn't.

Quote:You can see the movie I made, where I show off the ImmortalKillHeavy cheat here, i'm also testing a Renguard bypass, and you can't believe it, but only 3 of 28 players typed !rg tcusniper to see if I was cheating. No-one knew I was cheating and they didn't even notice in-game.

I am pretty sure we can believe it and know about it - you are fucking retarded coming here saying you are cheating in public servers and using an rg bypass on a forum moderated by Crimson from BHS

Now, perhaps if Crimson would be so kind as to provide your IP so server owners can ban you as well as implementing a renguard ban we can all have a good laugh at how COMPLETELY FUCKING RETARDED YOU ARE.
