I tried it, the installer version, without the bloom option cause I definitely think my graphics card
(Intel Extreme Graphics, integrated with up to 64mb memory) can't run it

Problems:
1. Flickering bullet holes when moving mouse (not picture)
2. Flickering damage marks when moving mouse, like those blackened places after an explosion.
(both pictures)
3. Is the lighting supposed to be that way? I mean, black light coming out from doors??? (both
pictures)
