it's indeed scrap that westwood left in the game. there's also a short description of it left inside the strings.

Szakolczay Type AS-2 Watchdog Automated Sentry Weapon: Designed to be a light, compact unit for maximum portability, the Watchdog folds out into an automated sentry position with friendly-fire detection utilizing standard signature protocols. This unit is effective for watching small areas or corner positions in tactical situations, making it an engineer's best friend as they go about their work. When Watchdog runs out of ammo, it self-destructs to prevent capture and reuse by the enemy.

meh, westw00t should have left the unfinished and scrapped stuff inside always.dat, for future modding purposes.
