Just for reference:

I believe a scud storm is a small range missile barrage that the allied units created in one of the C&C's

sorry, but ive heard that somewhere, and i just thought of GDI and missiles being fired.

Also, i seen it on TV, its war thing, those trucks that look like V3 rocket launchers, can also have Scud missiles equipped, and i know they are russian, because there was a scare of them back in the 80's (not sure on date) maybe someone can look it up for me?
