I and many others can enjoy myself without having to take any shit.

As always, drugs are for losers, whatever the effect it has on the body.

Only time you should be taking drugs is when you got a medical problem.

But anyhow, for the ones who do take, hurry up and overdose already, dont need selfish people that in this world.

Do you drink? Do you get tipsy or drunk ever? Why do you need to be? Isn't that just the same thing as what you're saying?

Replace your whole post with beer. Let's try it.

Personally I don't do drugs. Now if you don't drink and you agree with what I'm saying, then sorry for the accusation. If you do drink then stop being a hypocrite.
