 So I was playing in Kamuix C&C mode, minding my own business when suddenly my guy started flying into the air and dropping down. I thought it was glitch so I quit renegade and rejoined. Well a littlewhile later I alt tabbed and when I came back in I Was on top of the weapons factory on a non-flying map. But it doesnt just happen when im standign around or alt tab. A few games of tring to figure out my situation and I finnally got a tank thinking that would solve all my issues. Well it didnt, instead the tank and I bought learned how to skydive. So eventually I got tired of tring to figure it out and am currently minimized, Giving free sky diving lessons from the confines of my apc. There are several eyewitness' to this glitch, Blckmatt, A000Clown,Megamoo20, and stalli0nd. I want it to stop.

PS. It is not the only issue thats suddenly started going wrong, My cash keeps reverting back to 0 every so often. I watched as my 3500 credits went to 0 instantly. It only started happening today and I havnt altered my renegade since I reinstalled last week. Screen shots of my airplane adventures coming soon! (I hope)

Okay back from puff teh dragon world, Does ANYONE know how this is caused, and or how I can fix it? It makes my game completely unplayable.
