Subject: Re: Fps drops why? How can i fix
Posted by muffinjay on Thu, 18 Jan 2007 04:26:26 GMT

i think instead of fps drop i think its fps lag.. caused by other clients.. or someone else hosting..

Single player plays excellelntly 120 fps..
If i host a game on ren and run around.. 120 fps.. still..

if any client joins.. it kinda lags my fps.. its not really a drop.. i just can see my fps lag.. like its kinda a glitch that made it lag from 120 to the 18 i now recieve..
