Subject: Renguard disconnect automatically
Posted by naburaf on Sun, 21 Jan 2007 12:58:02 GMT

well, any previous problems were... "solved". but now I need your help for an old problem.

oh and btw, is the problem what the picture says it is?

I always have to open renegade twice because when I start it the first time a few secs(30 or something like that) later my renegade closes and it says this:

(If I click on nothing the Renegade option will turn gray after a while)

so if I click renegade again I can play but that's without using renguard. and sometimes people say that I cheat...lol

what can I do to prevent the disconnecting?

I already did what they asked about those corrupt files etc... it doesn't seem to work
