No you won't.

Just edit the refinery controllers, or the silos if there are no refs in the map.

That's what I sad, and if the map doesn't have silo's then it won't do much good to edit them. You could also use the script "GTH_Credit_Trickle" on a vehicle, then what ever team controls the vehicle gets the credits.

Plus he already said thanks which probably meant he question was answered.
