Now come on Crimson, pick better mods.

I kept getting Force Rg'd by your own mods, especially genlkozar.

Temp mods or not, he got me banned.

Most people on here know i dont cheat, and hes pissed he got pwned by me with my shotty.

Scenario:

Map: Hourglass
I was shotty, he was gunner hitting turret, i wall hugged so he couldnt see me, and when i knew he was reloading, i killed him with head shot.

Now then, everyone knows that shottys are INSANE in close combat.

Everyones going to say

"Get Rg then you noob"

I say, fuck you, ive tried over 10 times to get it, it crashes on me EVERY TIME.
I know i sound pissed, and i am, this is ridiculus, because you cant fix the bugs in it, i cant play on n00bstories which is my favourite server.

It goes through pre-patch check, shuts down, and calls it a day.

And when i asked for a test, he said "no you noob, get rg, you think you pwn me, but your the one banned"
