That statement is your opinion just as my opinion says cheat. You have modified the file to give yourself an advantage over everyone. You have, what is not freely available to everyone.

If, in the beginning, the Renegade snipers were meant to have clearscopes, to keep it realistic, then they would have been freely available. They were not and are not meant to be available, so the clearscope is clearly an advantage skin or in some opinions "a cheat".

The skin was done as "night vision" so that the snipers did not have a total advantage as they now have.

Some servers allow clearscopes, others don't. Feel free to try it out and best of luck.

Post here to let me know when you get banned.
