Hey there and welcome. We easely got 500 players online at the same time every night, so there's something wrong .

First of all a little installing guide for ren can be found here
[http://www.thekoss2.org/article.php?menu=game_info&cat=\[REN\]Installing](http://www.thekoss2.org/article.php?menu=game_info&cat=[REN]Installing)

Note that u at least need patch 1.037 .

When logging into WOL u need a nickname and a 8 letters long pass. If you get no servers in the list, that means someone else has already registered that nickname. Try another, maybe more original, one then .
