Renx wrote on Fri, 26 January 2007 21:34 One programmer congratulating another programmer on creating a program that does what's it's supposed to do, and does it good. Set aside what the program actually does for a moment and that all sounds fairly normal to me. Not to mention that v00d00 posted that after he had already blocked it from working in a newer RG version. I'd be saying the same thing about 0x90's coding skills personally... \*cheat name removed\* does a remarkable job of running stably for an application of that level of low-level complexity
