You are not helping SBot, you are only helping him with what the dialog should show up as, Like colors and other stuff that he wouldnt really need help with, for 1 you dont know any C++, I dont either, Doent make a difference about how pathetic you are lieng about everything.

Im going to defend Matix, to be honest.

- 1) Matix doen't know C++ yes.
- 2) Matix doesn't need to know C++ to help me with it.
- 3) There are things he is doing that are helping considerably
- 4) Im not very creative hence why i don't do any creative arts in school. im really bad at thinking something up on my own.
- 5) Matix has supported me alot, on MSN. i need that, it helps with motivation.

without him, i wouldn't of had the first commands working tonight. i wouldn't have implimented the "!killme" command, that takes a little bit more coding.

Matix has changed alot from before. although, you (Middle) and Matix are just as bad as each other.

I went to the library a couple of times today. I seriously don't know the difference between Native C++ and the Visual C++ Express Edition.. \*goes on google some more\*

Now for tyler..

Can you prove your not using your dad's money for all that?

Speaking of Matix..

Can Crimson or somone change my name back to Matix?

Yes i can prove that im not using my dads money, Ask Heyimdan.

Hes the 1 purchasing it.

And with the server name, and the webhosting. Ill give u some paypal logs right now.
