UPDATE: new page:

and also, i have started coding commands now. we should see a release soon. probably about another month.

The screenshot shows the SBot Version 0.0.1 web interface. The title bar reads "Sbot Version 0.0.1". The navigation menu includes: Start Page, Game Output, Game Input, Sbot Settings, Allowed Public Commands, Allowed Admin Commands, Allowed Moderator Commands, Command, Banned People, Ladder, Moderators, Admins, IRC Output, Auto-Announce (selected), and About. The main heading is "Auto Announce". Below the heading are three buttons: "Move Up", "Move Down", and "Remove". To the right is a "Set Timeout" field with the value "10000". The main content area contains a list of announcements: "This server is testing the Sbot", "This server could shutdown at any time", and "this server is hosted on a home computer - expect lag". The third announcement is highlighted in blue. At the bottom right, there is a button labeled "Ad".
