I prefer to gun control the gun by myself

I often find n00b asking me to let them gun my tank and they miss close to 80% of the time and they blame on my driving causing them not to aim properly. When I control the gun by myself I can hit at 95% of the time while moving so there is no point for me to let the other person gun.

Also I can take most tanks out 1 V 2 while I use either Light or Med. My personal best is using a med and took out 3 Stanks without help from my team. (one of the stank driver is C4kitty)
