Hi guys,

in renegade i was playing very well, then i log out after like 2 min, i entered a server, when i joined i couldnt move or look around with the mouse and there is no escape or W S A D movments keys and space and ctrl and shift nothing works.

then i pressed ALT + CTRL + delete then i got out of the game,

then i tried to get inter again and then i played the missions,

and in the missions i couldnt move and in the enernet i couldnt move, then reinstall the game,

then it worked fine after 2 days, the same things happend.

plz guys what do i do to fix that, i dont wanna just keap re installing plz guys help help help help
