Hi pal,

hope this helps.

oh and if none of the options works from the first post,
then try 192.168.1.254 or 192.168.1.1 .

and "Web Browsing Interception" is still a mystery,
its not in the manual or help guide!

it seems to be related to parental control,
but as 0x90 said "it's only affecting renguard"
very strange indeed

peace
