---

I recently bought a new laptop, an HP DV9210us. It is running Windows Vista Premium Home edition.

I installed Renegade and tried running it and got the message "A problem caused the program to stop working correctly. Windows will close the program and notify you if a solution is available"

I tried running it in XP SP2 Compatibility, Same deal.

I tried running it in Win 2000 Compatibility, no dice.

Any suggestions? I REALLY want to be able to play Ren on the go.
