majikentMadtoneDOH!!!

LMAO, thanks for that, i had one number wrong on the gateway!!!

Now i got everything working !! Thanks mate

Now i have Windows 2003 server, Windows 2000 Advanced Server, Windows 2000 CE and Windows 98 all on the same network!! lol, that was not easy!!

Glad I could help... I knew if it wasn't a compatability issue it was going to be one of those kick yourself in the ass things. Just glad I remembered some of this stuff... sooner or later (or when I have enough money) I'll go and take those darn certification tests.

Yes you should, they are well worth it!! I might be taking my exams for it soon, doing it over the net, im going for the Microsoft Certified Database Administrator on SQL 7.0 and SQL 2000
