Okay, two questions and a problem for you jonwil.

I'm just curious if these are possible:

1. 3rd person reload animations
2. showing more than one gun on a person. Like in Counter-Strike source, you can see all the weapons a person has, pistol, rifle, etc. Renegade only shows the next weapon in your inventory.

Also, a slight problem. When playing normal Renegade, I sometimes get weird diagonal lines. I can clear this by Alt-tabbing out of Renegade, and then going back in. I'm pretty sure that this is a scripts problem because when I upgraded to the most recent version for APB, it now happens in APB and the game crashes when I try to alt-tab out of the game. It looks like this:

I have no idea what the problem is. I tried updating my video card drivers, but that didn't fix it.
