You started to say shit about Seye. That = you started am I correct?

Next up, where does it say n00bs attacking you with flames, I believe that attack is legitimate, and has nothing to do with RenHawk and/or Seye.

I have been attack by a flamer by noobs plenty of times. And since Seye never came out as a public release, and RenHawk isn't live, how would they have the advantage?

You make no sense.
