Being realistic and knowing the pimped grav gun will be much more of a use in a RP styled map, i won't find it a problem to share what i have so far. Just give me a call when interested.

Im talking about sound, and the cosmetic part, the rest of our guns are already virtually the same.

I have the urge to spam this topic with funny situations done with it, but ill resist.

edit: lol dammit, fixed a typo wich wasnt a typo after all
