Update:

Finished !donate

Changed the commands editor. so you can use !playername! !accesslevel! and !commands!.

!playername! - will convert to the name of the player that called the command.

!accesslevel! - access level of this player. if it is a mod or admin, but they are logged out; it will display as Public.

!commands! - commands that this player has permission to use.

example for !help.

!accesslevel! commands are: !commands!

would translate to (if i was Admin and logged in)

Admin commands are: !help !ahelp !kick etc etc...
