I agree. No tech support this feature, and no advertisement is what will kill it. This is ultimately why RenEvo didn't get these boards.

This is why people like ACK get exposure for what they do. Anyone heard of "Glacier"? Like it or not, he marketed his product well, and people noticed.

What good does creating an excellent product do if NO ONE KNOWS WHAT IT IS, WHERE TO GET IT, OR HOW TO INSTALL IT? You might as well have created it for yourself, because no one else will ever get to see, or experience you creative genius.

Thus my point. REOL is quiet, because NO ONE knows it's there.....
