Quote:If a school starts to lose students (and money) it would be required to perform better with less money? Doesn't sound like a recipe for success to me.

Think of it this way. If the teachers realized that they were about to lose their jobs, they would strive to do a better job, hence, a better learning environment, better school ratings, more students coming back in. Of course you can't say it would work like that for sure, but that's the general idea.
