Update:

ok first of all. i added:

!playerlist - only works in IRC not checked by Access levels
!playerinfo - only works in IRC not checked by Access levels
!gameinfo - only works in IRC not checked by Access levels
!kill <playername>
!fds <command>

ofc, aliases work for all these commands. so:

!pl
!pi
!gi

when a building is killed it will say along with the last damage caused.
when a player is killed it will say along with what by and what gun / charater.
when a vehicle is bought it will say. although atm, it is duplicating the message. this is scripts.dll
and nothing can be done about it atm.
when the host says something, it will say in IRC.

i forgot to change the darkblue to light blue in the last one.
