Hey guys,

I'm pretty bored these days. I have some free time on my hands as school is going pretty slowly these days. So if anyone wants me to work on anything for thier mods i would be more than happy. My true passion is modeling, but i can also rig vehcs and guns, do animations, and prep vehcs in LE. I'm not the greatest at texturing but I try hard.

If you want to give me a little test to see what i can do then be my guest. If it doesn't meet your standards then feel free to give me the boot.

Jamie
